

Ways to test or use your google cloud run functions

- curl (Command-Line Tool)
curl -X POST \
-H "Content-Type: application/json" \
-d '{"name": "john"}' \
YOUR_FUNCTION_URL
- Postman (GUI Tool)
Go to <https://www.postman.com/>
 - Create a new request in Postman.
 - Set the request type to POST.
 - Enter the URL of your Cloud Function in the URL field.
 - Go to the "Headers" tab and add a header:
 - Key: Content-Type
 - Value: application/json
 - Go to the "Body" tab and select the "raw" radio button.
 - In the text area, select "JSON" from the dropdown on the right.
 - Enter your JSON payload
 - Click "Send" to send the request.
- JavaScript (within a Web Page)
- Python IDE or Notebook
